

# Astronaut's Name

---

## Background Information

You belong to a space ship crew who according to plan should meet the mother ship on the light side of the moon. Due to technical failure your ship as forced to land in a place situation about 300km from the rendezvous. During landing manoeuvres a great deal of the equipment aboard was destroyed.. Since you have to reach the mother ship to survive, your first objective will be to select the equipment necessary to the 300km march. Your task is to rank in order of, most important to least importance, with regard to how useful it would be as an aid to your crew on the trip to the rendezvous. Put 1 before the most important item, 2 before the next important and so on to 15 before the least important.
